World-first restaurant Eatrenalin wins Travellers' Choice Award 2024

The innovative gastronomy experience Eatrenalin, opposite the 4* superior hotel 'Krønåsår' at Europa-Park, was awarded the Travellers' Choice Award for 2024 by TripAdvisor. This top-class gourmet journey brings gastronomy at the highest level and the most state-of-the-art technologies together to create a completely new fine dining experience. Guests experience an extraordinary eight-course menu, accompanied by visual, acoustic and haptic effects to appeal to all the senses. In the 'Ocean' world of indulgence, sensual delights from the depths of the sea are served in the form of Argentine red shrimp with mango and tobiko. "I liked Ocean most of all, since I actually went down there for a moment. You ought to inhale and exhale deeply there; I found that very pleasant and impressive. In all, it was extraordinary, almost otherworldly! It was a little like a dream!" said presenter Rabea Schif, having recently visited Eatrenalin.

The CEO of Eatrenalin, Thomas Mack, also said he was delighted by TripAdvisor's award: "The Travellers' Choice Award is a great honour for our team and acknowledgment of our having created, with Eatrenalin, a concept unique to the whole world that has a lasting impression on guests".

The Travellers' Choice Awards recognise travellers' and guests' favoured destinations, hotels, restaurants and activities. These awards are based on reviews submitted from around the world over a 12-month period on Tripadvisor. Business consistently receiving exceptional reviews are recognised in the Travellers' Choice Awards. The winners of this prize are part of the best 10% of businesses. Select accommodation, attractions and restaurants, listed on Tripadvisor, that consistently demonstrate first-class hospitality receive a Travellers' Choice Award from Tripadvisor.
